

ORLEN OIL 2T SEMISYNTHETIC

General features

Semisynthetic oil designed for twostroke engines.

Application

Semisynthetic oil for twostroke engines, including those with a cylinder capacity from 20 to 500 cm³, suitable for mixed and separate lubrication. It is intended for: engines of chain saws and disc saws, engines of brushcutters, all types of garden equipment equipped with twostroke engines, cars, motorcycles. Dosing: 2% relative to fuels / 1: 50 / if the engine's manufacturer does not recommend otherwise.

Quality class

API: TC

JASO FC

ISO-L-EGC

Physical and chemical properties

Parameters	Unit	Typical values
Kinematic viscosity at 100 °C	mm ² /s	9,9
Pour point	°C	-30
Flash point	°C	70
Sulfated ash	%	0,17

Note: Physicochemical parameters listed in the table are typical values. Real values are stated in quality control certificates attached to each production batch.
